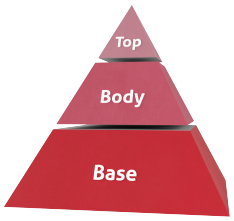
Bigarol Raspberry PE

(SYM_203870, PHYT_50007) - Flavour type Red Fruit

PROFILE DESCRIPTION

Raspberry vanilla flavour, rounded off with red fruit and wild berries.

Topnote (Volatility): Raspberry
Bodynote (Character): Redfruit, wildberries
Basenote (Longlasting): Vanilla



APPLICATION

Recommended for **piglet feeds** with moderate to high levels of bitter substances. It is also effective in **masking metallic** and **chemical notes** of mineral feed mixtures.

CHEMICAL STABILITY

Product is feed acid-stable (**8**)!

(The higher the ingredients' reactivity **(1-10)**, the less responsive they are to acidic or alkaline feed components.)

HEAT STABILITY

Highest stability in mineral feeds.
Interesting fact: the special ingredients of raspberry leads to the highest thermal stability (**8**).

1 to **5**	NOT suitable for thermal processes like pelleting
6 and **7**	Heat-stable (flavour loss of up to 10%)
8,9,10	Under high-temperature conditions (<95°C), minimal flavour loss (approximately 2-5%) occurs as a result of the inherent characteristics of the flavour ingredients.

INCLUSION RATE

200 g/t final feed
If the feed undergoes expansion (~120°C) or extrusion (~150°C), the inclusion rate should be multiplied by 1.5.

- Piglet mineral feed (4%): 5.000 g/t

TARGET SPECIES

Also approved for Ruminants, Horses, Freshwater Fish, Poultry and Rodents.
