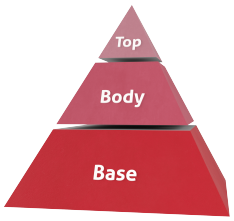
Miracol Cherry V1

(SYM_497493, PHYT_50051) - Flavour type Red Fruit (Cherry)

PROFILE DESCRIPTION

Full-fruity, ripe marasca cherry, rounded off and refined with a sweet vanilla note.

Topnote (Volatility): Marasca cherry
Bodynote (Character): Marasca cherry
Basenote (Longlasting): Vanilla



APPLICATION

It is preferred by both humans and farm animals due to the characteristic smell and taste of cherry. It can be used especially in feeds for **pigs** and **piglets**.

CHEMICAL STABILITY

Product is feed acid-stable (**8**)!

(The higher the ingredients' reactivity **(1-10)**, the less responsive they are to acidic or alkaline feed components.)

HEAT STABILITY

Thanks to a specialized encapsulation technique, the flavour remains highly stable in mineral feeds (heat-stable, **8**).

1 to **5**	NOT suitable for thermal processes like pelleting
6 and **7**	Heat-stable (flavour loss of up to 10%)
8,9,10	Under high-temperature conditions (<95°C), minimal flavour loss (approximately 2-5%) occurs as a result of the inherent characteristics of the flavour ingredients.

INCLUSION RATE

~200 g /t final feed
If the feed undergoes expansion (~120°C) or extrusion (~150°C), the inclusion rate should be multiplied by 1.5.

- Piglet mineral feed (4%): 5.000 g/t

TARGET SPECIES

Also approved for Ruminants, Horses and Rodents.
